

ACCELA WIRELESS

Accela Wireless™ is a mobile government application that extends inspection management capabilities to the field for all types of inspections including disaster response, code enforcement, work orders, service requests, and more. Accela Wireless runs on a number of operating systems including Pocket PC, Windows 2000, and Windows XP, making it compatible with a variety of mobile devices such as PDAs, Tablet PCs, and laptops.

Product Features

- Create new inspections
- Cancel, reschedule, or reassign inspections
- Sign off inspections
- Utilize checklists
- Review case, application, or permit summary
- Correct and resubmit transactions
- Create new case, application, or permit with new inspection
- Customize labels
- Access multiple inspection lists
- Utilize offline capabilities when in a remote area
- Track inspection time and mileage
- Optimize travel route for daily inspections
- Draw and attach sketches to inspections
- Create and print reports in the field
- Utilize standard comments to save time

EMPOWER YOUR MOBILE WORKFORCE

Following the devastation of Hurricane Katrina in September 2005, the New Orleans Building and Safety Department quickly mobilized to begin damage assessment efforts using Accela Wireless. With an automated mobile solution, **inspection teams completed more than 125,000 building inspections in just weeks**, versus the many months it would have taken using a paper-based system.

"We wouldn't be where we are today without Accela software, I can honestly tell you that. It's really been a true assistance to us. I think it has sped us up fivefold."

Mike Centineo
Director, Department of Safety and Permits
New Orleans, Louisiana

Angela A. Smith
Deputy Director
Department of Permits & Inspections
Washington County, Maryland

"We are pleased with the addition of Accela Wireless because the **application translates to more field time for our inspectors**. The application allows inspectors to store inspection information in the field and automatically upload results to the database when they return to the home office, eliminating a data entry step they had to perform in the past."

Dori Lienhard
Database Administrator
Moreno Valley, California

Accela Wireless™ integrates with your Accela solution to provide flexible remote office capabilities.

CREATE INSPECTIONS IN THE FIELD

While in the field responding to reported code violations, inspectors often come across additional violations that have yet to be reported—abandoned vehicles, illegal signage, or lack of landscape maintenance for example. Accela Wireless allows inspectors to view current parcel data or code violation history by remotely accessing their land management database. Inspectors can then create new cases on the spot using the most current information available.

ENHANCE YOUR MOBILE INSPECTIONS

Accela Wireless ensures that even when inspectors are out in the field, they are never out of touch with the office. Users can assign, reschedule, or cancel inspections and last-minute updates or alerts can be sent to the inspector's mobile device automatically. Inspectors will not waste time driving to and from inspections, maximizing their time in the field.

PERFORM RAPID DAMAGE ASSESSMENT

Following any major disaster, reliable and immediate information is the most valuable tool for jurisdictions to have as a means to assess the damage and create an accurate recovery plan. Accela Wireless enables emergency response teams to report real-time data from the field, streamlining the damage assessment process and improving agency responsiveness.

PARTNER WITH A LEADER

KNOWLEDGE

Accela's knowledge base comes from working with the public sector domain for over 25 years. Accela has managed more successful implementations than anyone else in the industry. With every project, we are committed to delivering a successful product launch and providing continued, professional support.

LEADERSHIP

Accela has long been a technology innovator for the public sector. We play an active role in developing and promoting interoperability standards for the government automation industry and because of this leadership, our products provide our customers with effective solutions that can continue to grow and expand with their agency.

EXPERIENCE

Led by a skilled management team with many years of experience developing enterprise solutions, Accela makes a great partner for your agency. We currently serve more than 500 agencies in the United States, Canada, and Puerto Rico. Join the hundreds of agencies who have already partnered with Accela to provide efficient, effective services to citizens.
