

SOLUTION OVERVIEW

Accela Civic Application™ for Fire Prevention

A complete system for managing permitting and inspections for fire departments.

Create safe and protected communities by preparing for unexpected incidents

Unexpected disasters can have lasting impacts on a community's economic resiliency. Its preparedness can be the difference between manageable property damage and large-scale devastation. Fire regulation and oversight is key, with recurring fire inspections, permitting and plan review acting as a first line of defense against irreparable damage or loss of life.

The Accela Civic Application™ for Fire Prevention is a pre-packaged solution built for fire departments, and offered at three levels: Essentials, Extended, or Enterprise. The levels allow you to choose the best option for your budget and needs, while gaining best practices from Accela's fire prevention expertise.

Benefits

Streamline fire inspections

Simple and complex fire inspections are streamlined when inspectors have access to prior inspection history in the field, can work offline and share inspection results with property owners in real-time – all from an easy-to-use mobile application.

Improve schedule tracking and communication

Fire captains and supervisors have the option to set up rules to help with inspector scheduling, and ensuring coverage across shifts, fire houses, inspector expertise and even vacation schedules.

Increase cost recovery

Increase cost-recovery when property owners are prompted to pay fees on time with options for automatic notifications, and paying fees online is easier than ever through the online public portal.

Greater visibility into operations

Improve efficiency and visibility on projects with options for workflow tracking for both back-office staff and property owners that ensures everyone is on the same page, helping reduce status inquiries and lost paperwork.

Quick installation

Accela® Fire Prevention is built with deep domain experience, allowing the system to be set up faster, and with best practices included – helping agencies minimize downtime during a new implementation.

Each level features industry-leading tools, including a modern mobile inspection app, permit processing in the cloud, and a public portal to improve access for property owners.

Accele Fire Prevention Levels

Essentials

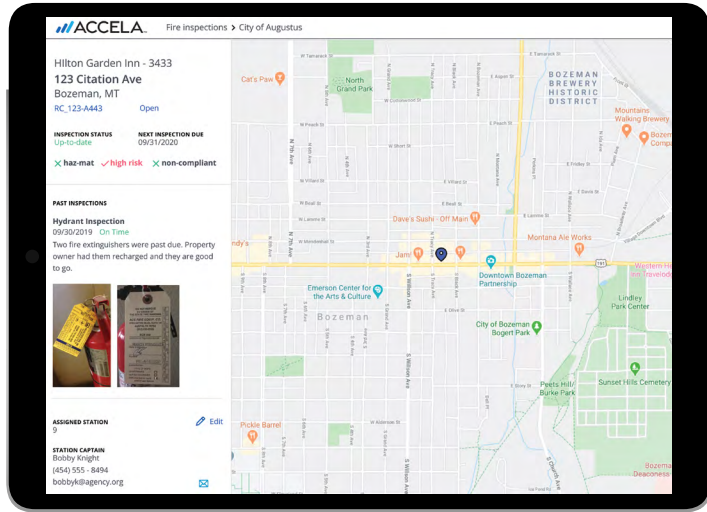

Fire Prevention Essentials is perfect for smaller agencies, or those that want to get online and mobile quickly. The pre-built functionality included in Essentials allows your department to leverage best practices to be installed quickly, and on budget.

Extended

Fire Prevention Extended is best for fire departments faced with complex workflows and operations across divisions. The Extended level builds on Essentials to offer a higher level of customization, workflow tracking and automation to digitize tedious processes that lead to backlogs and errors in data.

Enterprise

Fire Prevention Enterprise offering is best suited for larger and more complex fire departments with specialized needs. It is fully-featured and offers greater flexibility, extensibility, and customization over time.

Features

Utilize ESRI's ArcGIS Online to produce interactive maps, with options for buffering around hot spots and areas of concern and inspection routing

An easy-to-use, modern mobile app included with each level offers pre-built checklists, offline mode, the ability to view past inspection data while in the field and options for tracking inventory and other specialized inspection types

Platform-wide APIs, SDKs, and open data, allowing developers to integrate with existing software solutions to meet the unique needs of any community

Property owners can submit fire permit applications, schedule occupancy inspections, pay fees and track the progress of their project in the online portal

Process automation available in the Extended and Enterprise levels help automate tedious tasks and complex workflows

Powerful analytics and reporting to track department goals on inspection coverage, staffing levels and generally how the department is performing across district, station and program

Convenient online payment with full tracking and auditing
