

SOLUTION OVERVIEW

Accela for California CUPAs

Accela helps California CUPAs manage critical data and permits, conduct inspections, and exchange data with CalEPA.

Ensure compliance and public safety

Rigorous, complex data management and reporting requirements fuel the important work California's CUPAs perform to keep residents and first responders safe. CUPAs must manage data received from various sources while also conducting inspections, issuing permits, and implementing and monitoring enforcement actions.

More than 50% of California CUPAs use Accela's cloud solutions and the Accela® CERS Adapter to meet these challenges every day by:

- Receiving and submitting records via CERS, with automatic updates to Accela records
- Facilitating transparency with a public portal, automated reporting, and agency-wide data exchange
- Automating inspection coordination and enforcement follow-up

Benefits

Boost operator satisfaction

Facility operators can pay fees and track the status of their permit through a single online portal, reducing travel burdens and application processing timelines.

Improve compliance

Up-to-the-minute data in the field allows staff to better serve and enforce CUPA requirements while on-site.

Increase productivity

Increase productivity and control labor costs by automating manual processes, while staying prepared for changing regulations and unexpected events with easily configurable software.

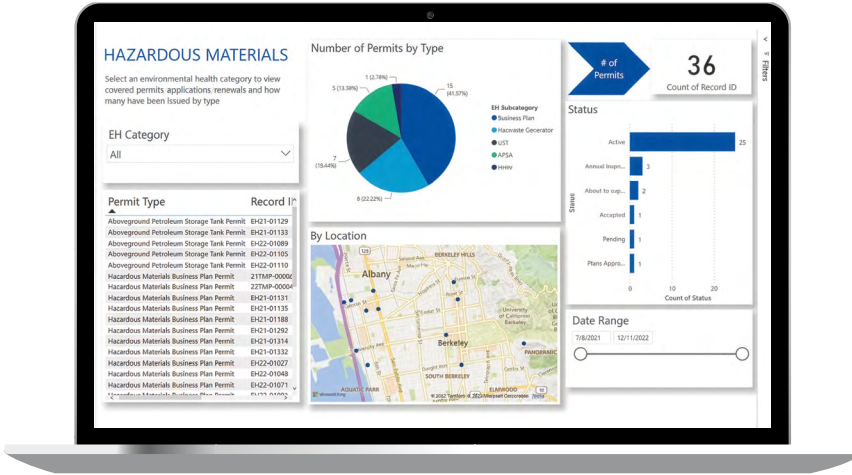

Integration with CERS

Automatic integration of data from CERS guides inspection and enforcement activities.

Greater visibility

Identify violation trends to help inform the approach for future inspections.

Features

Seamlessly intake, incorporate, and/or report Owner, Facility, Accounts Receivable, Permit, Inspection, and other critical data to CalEPA. The CERS Adapter can be scheduled or run on demand and is certified by CalEPA for CERS Submittal Download and CME Upload

Advanced geographic information system (GIS) capabilities enable precise location-based data capture and analysis, facilitating assignments by inspector district

An easy-to-use mobile app offers pre-built checklists, offline mode, and the ability to view past inspection data while in the field

Automated workflows to assign tasks, track and schedule inspections, link documents and other information to records, and automatically track complex billing and surcharge fees

The self-service operator portal accepts documents and payments 24/7. Facility owners can communicate with your agency and monitor the status of open proceedings with your department

Platform-wide APIs, SDKs, and open data enable developers to integrate with existing software solutions to meet the unique needs of any community

The Accele solution for California CUPAs

The Accele Civic Application™ for Environmental Health, which includes features built for California CUPAs, is a cloud-based solution that digitizes and automates workflows for operators, inspectors, and employees.

The solution enables facility owners to interact with their CUPA online, pay fees, and track project status from anywhere, anytime. Field inspections completed on mobile devices send results immediately to the cloud and to CERS. This gives program managers the data and tools they need to focus on education and compliance.

Accele serves agencies of all sizes, facilitating collaboration between businesses and regulators, now with cross-department workflows and shared accountability. Accele's solution is built on highly configurable, fully supported components to help agencies meet their unique needs.

By spending less time reconciling with CERS and more time on program improvements, CUPAs can allocate resources where they're needed most and better protect public health. The results are improved internal productivity, enhanced service delivery, and better protection for the community.
